

Javascript String Length

```
const str = "This is JavaScript";
```

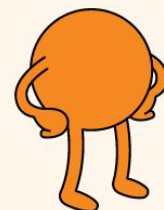

The length property returns the number of characters in a string.

Output -

18

```
const result = str.length;
```

....give me the length of the string

Piyushd_21

....let me see what happens if I assign a value to `str.length`

```
const str = "This is JavaScript";

// assigning a value to string's length property
str.length = 5;

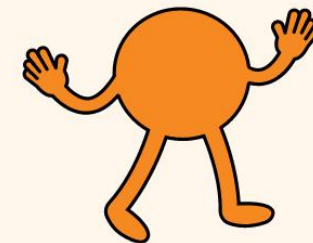

// printing the string
console.log(str);

// returns the length of the string
console.log(str.length);
```

This is JavaScript

18

Assigning a value to string's length property has no effect

....no effect
